Background

Seems to function as an adapter protein. In adherens junctions may function to couple syndecans to cytoskeletal proteins or signaling components. Seems to couple transcription factor SOX4 to the IL-5 receptor (IL5RA). May also play a role in vesicular trafficking.

Western blot detection of Syntenin in HeLaNE and HeLa cell lysates using Syntenin mouse mAb (1:1000 diluted). Predicted band size: 32KDa. Observed band size: 32KDa.
