Background

This protein is an anticoagulant protein that acts as an indirect inhibitor of the thromboplastin-specific complex, which is involved in the blood coagulation cascade.

Western blot detection of Annexin V in HeLa and COS7 cell lysates using Annexin V mouse mAb conjugated with HRP (1:5000-1:100000 diluted), incubation time: 25°C 1h. Predicted band size: 30KDa. Observed band size: 30KDa.
