Background

Swiss-Prot Acc.P08207. Because S100A10 induces the dimerization of ANXA2/p36, it may function as a regulator of protein phosphorylation in that the ANXA2 monomer is the preferred target (in vitro) of tyrosine-specific kinase.

Western blot detection of S100A10 in C6, 3T3 and HeLa cell lysates using S100A10 mouse mAb (1:1000 diluted). Predicted band size: 11kDa. Observed band size: 11kDa.
