

Product Datasheet

DiMethyl-Histone H3 (Lys9) (10B2) Mouse mAb

Catalog No: AB3529

Reactivity: Human, Mouse, Rat

Isotype: Mouse IgG1

Applications: WB

www.abways.com

Information

UniProt ID: P68431

All Names: H3K9me2; H3 histone; HIST1H3A; Histone cluster 1; H3a

Form: Liquid

Storage instructions: Store at +4°C short term. Store at -20°C long term. Avoid freeze / thaw cycle.

Storage buffer: pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Purity: Affinity-chromatography

Immunogen: A synthesized peptide

Molecular Wt.: 15kDa

Application

WB: 1/500-1/1000

Background

Swiss-Prot Acc.P68431. Core component of nucleosome. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling. This histone is only present in mammals and is enriched in acetylation of Lys-15 and dimethylation of Lys-10 (H3K9me2).

Western blot analysis of DiMethylHistone H3 (Lys9) (10B2) in MCF7, C2C12, C6, 3T3, HeLa lysates using DiMethylHistone H3 (Lys9) (10B2) antibody.

For Research Use Only. Not For Use In Diagnostic Procedures.
