Background

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation.

Western blot analysis of extracts from JK cells and K562 cells, treated with Forskolin (20uM, 1 hour) , using DRP1 (Phospho-Ser637) antibody.
